

The NSF Beverage Quality Program Connects You to a World of Services

The NSF Beverage Quality Program empowers bottlers from around the world to convey their compelling story of product safety and quality to regulators, retailers and, most importantly, consumers. NSF International can connect your business to a world of services that enhance your entire bottling operation. Because in today's competitive marketplace, very little separates one beverage from another. The NSF Beverage Quality Program is a way for your business to the world and set your product apart from your competitors.

Service Offerings

- HACCP audits conducted for company owned (COBO) and franchise owned (FOBO) bottling operations to support financial and competitive opportunities
- ISO 22000 certification which connects safety and quality standards
- Compliance with United States and European Union standards required for exporting your product to other markets
- Global Food Safety Initiative (GFSI) Schemes including ISO 22000 with PAS220 to meet your customers requirements
- Measuring your Water, Greenhouse Gas and Carbon footprint for environmental reporting and sustainability programs
- Organic certification of beverage flavorings through Quality Assurance International (QAI)
- Plant inspection to standards set by retailers, trade associations and regulators
- NSF Mark of certification validates the safety and quality of your products across the United States, Canada, EU, Australia, Middle East, Singapore and many others

Essential Program Attributes

NSF values our customers and wants to provide the highest level of service and programs to meet all your needs. The essential features of the NSF Beverage Quality Program include:

- Unannounced audits
- Local audit and testing
- Global benchmarks
- Customized audits
- Single agency for all certification, management and QA program needs
- Consistent benchmarks for COBO and FOBO
- Experienced global auditors

Beverage Industry Services

Web-Based Feature

NSF Online is a web-based solution designed to empower you with the right information to make critical business decisions by giving you instant access (24/7) to your data whenever you need it. Through the single gateway, you can gain access to your test reports, audit reports, corrective actions and invoices. NSF Online also provides you the ability to manage your internal users.

With a click of a mouse, you can create online reports for plant operators and senior management.

About NSF International

NSF International, The Public Health and Safety Company™, a not-for-profit, non-governmental organization, is the world leader in standards development, product certification, education and risk-management for public health and safety. For over 60 years, NSF has been committed to public health, safety, and protection of the environment. While focusing on food, water, indoor air, and the environment, NSF develops national standards, provides learning opportunities through its Center for Public Health Education and provides third-party conformity assessment services while representing the interests of all stakeholders.

Serving manufacturers operating in 80 countries, NSF was founded in 1944 and is headquartered in Ann Arbor, MI USA. The NSF Mark is recognized for its value in international trade around the world and is respected by regulatory agencies at the local, state, and federal levels.
