AnalyticalSM

 An NSF International Company

Partner with the Experts.

DBASM Analytical

the laboratory division of David Begg Associates (DBA), is a technology and life sciences contract research and consulting firm offering extensive testing and analysis.

At DBA Analytical, our scientists possess extensive knowledge and expertise in both the pharmaceutical and dietary supplement industries. Our team is available to assist you in solving your most challenging analytical issues. We can cover all your project needs with routine analysis, custom analytical method development and stability services to meet your company's immediate and future needs.

Scope of Our Capabilities

Located in Ann Arbor, Michigan, we have 150,000 square feet of state-of the-art laboratories, including an extensive array of instrumentation and technologies with toxicology professionals to provide fast response risk assessments of your project data. Our analytical capabilities combined with exceptional teamwork and customer service enable us to solve your most challenging undertaking yet. Our capabilities include:

Consulting

Staying at the leading edge of pharmaceutical and dietary supplements training means that we keep abreast of every major industry issue. You can put that knowledge to good use by taking our advice on a broad range of regulatory and technical matters

Auditing

We can audit any type of activity against all the major international regulatory and GMP standards, including EU, USA, Canada, Australia, WHO and more.

Training

Our training is used by the pharmaceutical and dietary supplements industries worldwide to comply with regulatory expectations and maximize the contribution of a firm's staff at all levels.

Testing and Stability Services

Our testing comprises analytical and bioanalytical testing for dietary supplement finished products, active ingredients, raw materials for label claim verification, contaminant testing and research and development.

With our storage and stability testing capabilities, we are well positioned to offer testing for all types of products including API's and dietary supplements (ingredients and finished products) as well as long term and accelerated stability testing.

Regulatory Review and Safety Assessments

- New Dietary Ingredient (NDI) Notifications
- GRAS (Generally Recognized as Safe) Affirmations
- Food Contact Notifications (FCN)
- Risk Assessments
- 21 CFR Reviews
- Food Additive Petitions (FAP)

Choose DBA Analytical as your reliable partner, providing you with compliant, quality data and project reports on time, every time.

“ DBA Analytical has been extremely cooperative and efficient in testing our products. Confidence in the accuracy of their assays is critical to us and DBA Analytical, and they have a proven track record in this regard. We appreciate their lab’s efforts in modifying assays to meet our products and raw material challenges. I know when I send DBA Analytical samples, they will be done correctly and on time. ”

Mr. Bob Pitts
Vice President of Quality Assurance and Regulatory Affairs
Bioniche Animal Health USA, Inc.
