

Food Equipment Certification

Food Equipment Certification

NSF Food Equipment Certification will help customers/buyers achieve the International Standard for Food Safety. NSF's full range of testing, evaluation and review services support you in gaining product acceptance and code compliance. Whether you manufacture food handling or holding equipment, refrigeration or dispensing equipment or other food and beverage equipment, NSF is your partner around the world.

Why Choose NSF?

1. Sanitation acceptance by regulatory agencies
2. Consistency in product safety anywhere in the world
3. A half century of food equipment experience
4. Value-added services including energy efficiency and performance testing
5. Access to new markets
6. Complimentary NSF Online account management and data system

Steps to Certification

To deliver the personal attention you deserve, an NSF Project Manager will guide you through certification every step of the way and partner with you to provide the best service for your future needs. Our certification process is fast, thorough and the most effective way to bring your products to market and include:

1. Product Assessment
 - a. Design and Construction Review
 - b. Material Evaluation Review
 - c. Performance Testing (when applicable)
2. Certification and appearance in NSF official listing
3. Product Facility Audit

Our certification programs team up with you to build and distribute the safest products around the world. Our programs include:

1. Food Equipment Sanitation Certification
2. Housewares Certification
3. Cert Plus - Customized Services and Consulting
4. Energy Efficiency Testing
5. Regulatory Assistance
6. Training & Education
7. Sustainability Services
