ISO 9001

In today's global marketplace, many organizations are utilizing ISO 9001 as a platform to build their business management system. Registration to ISO 9001 can be the key to securing and maintaining global business and can be conducted in conjunction with your product certification.

Benefits of Registration to ISO 9001:

- Improves internal communications
- Improves system and process quality
- Requires your organization to monitor and improve
- Enables your organization to become more cost-effective
- Provides a passport to the global market

If you want to gain the ISO 9001 certification, NSF International can help you obtain compliance.

For more information visit us at www.nsf.org or contact foodequipmentinfo@nsf.org, +1 734.913.5795.

Energy Efficiency Testing

NSF can now conduct energy efficiency testing for commercial refrigerators and freezers in support of the Energy Star enhanced program. We can provide a “one-stop shop” for energy efficiency testing, sanitation testing and certification, to help save time and money and will include:

- Cost break for doing both sanitation testing and efficiency testing at the same time
- Test Report provided in 2 weeks for products that are already certified to the NSF sanitation standard.

If you want to gain the Energy Star rating on your refrigeration equipment, NSF International can help you obtain compliance.

For more information visit us at www.nsf.org or contact foodequipmentinfo@nsf.org, +1 734.913.5795.

Understanding EU Directives

Do you know if your materials are compliant with the latest EU directives? Are you encountering difficulties exporting your materials into other countries?

At DBA Analytical, an NSF International Company, we have these answers and more. Our team of experts can assist you in obtaining a compliance certificate for your products.

EU directives are essentials for trade in the EU, reaching over 500 million citizens in 27 countries! At DBA Analytical, Food Contact Materials (FCM) are materials that have direct or indirect contact with food. If you manufacture or sell Food Contact Materials into the EU, DBA Analytical can assist you to obtain compliance to the Framework Regulation (EC) 1935/2004 and/or Directive 2002/72/EC.
