

Plumbing Certification Program

Live safer.™

One Stop Shopping for North American Plumbing Product Compliance

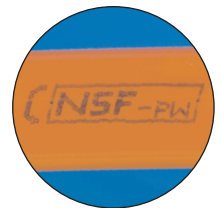

For over 40 years, NSF has been known as the plumbing industry's leading testing and certification organization. Manufacturers of products certified to NSF/ANSI Standard 14 and NSF/ANSI Standard 61 enjoy acceptance of their products across all of North America, in all jurisdictions.

Now, to help you save time and simplify the compliance process, NSF can help consolidate your listings by using NSF for your Uniform Plumbing Code and Canadian listings. Learn more below, then contact us to begin seeing the benefits of NSF's bundled listings:

Canadian Listing

NSF's "cNSF" mark allows manufacturers to sell into Canada. NSF's plumbing certification program is accredited by SCC and the "cNSF" mark is accepted across all Canadian provinces.

Uniform Plumbing Code Listing

For manufacturers who wish to demonstrate compliance to the Uniform Plumbing Code, NSF offers the "U.P. Code" listing. This indicates compliance to the code, and is accepted across the United States.

Combined Canadian/United States Listing

The "cNSFus" mark takes certification one step further, meeting requirements and assuring product acceptance across both the US and Canada.

Verifiable Listings

Once clients receive the "cNSFus" or "NSF-U.P. Code" listings, the information is made publicly available on the NSF website for easy reference. To see this page on the NSF listings website, visit: www.nsf.org/certified/plumbing, then search under "Canadian and Code Listings."
