Proposition 65

**Who's
looking out
for you?**

To be big on Proposition 65 you have to catch the little things.

For Proposition 65 the devil is in the details. Failure to comply with the requirements can result in costly litigation and fines.

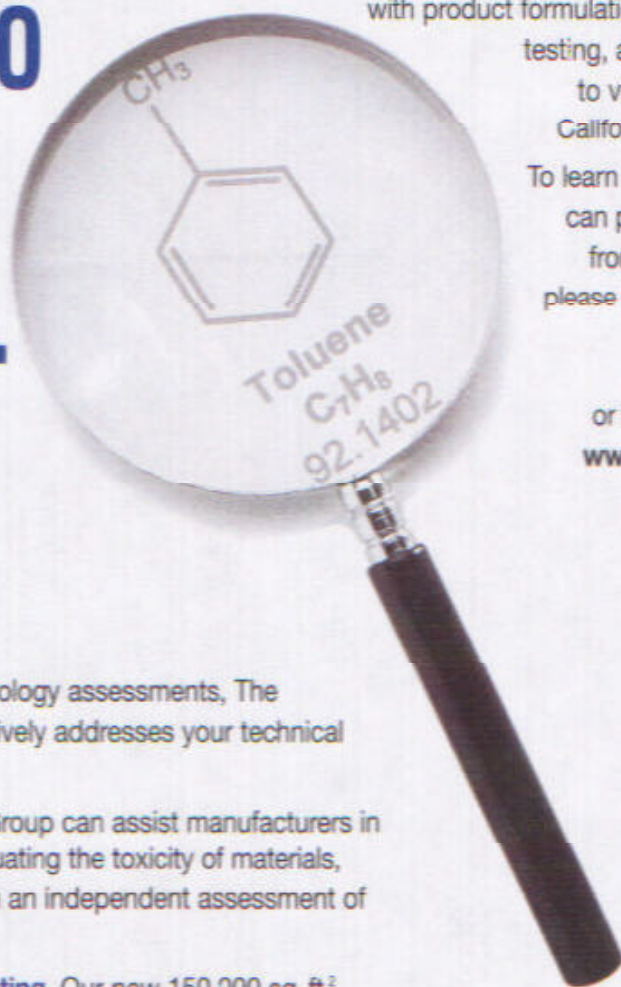

The Toxicology Group, LLC can assist you in ensuring that your product meets the requirements of Proposition 65 by providing a variety of toxicology and chemical services tailored to meet the needs of your particular product and liability concerns.

The Toxicology Group, LLC provides its clients with product formulation reviews, exposure testing, and risk assessments to verify compliance with California's Proposition 65.

To learn more about how you can protect your business from litigation and fines, please contact Chris Bradlee

(734.913.5756 or bradlee@nsf.org)

or visit our web page at www.nsf.org/toxgroup.

The Toxicology Group, LLC – Creating Value For You

As the leader in value-added toxicology assessments, The Toxicology Group, LLC cost effectively addresses your technical and business needs.

Safer Products. The Toxicology Group can assist manufacturers in developing safer products by evaluating the toxicity of materials, prior to use or production, through an independent assessment of risks and hazards.

Comprehensive Customized Testing. Our new 150,000 sq. ft.² building with toxicology and testing capabilities includes state-of-the-art microbiology, analytical chemistry, physical and exposure laboratories. These labs permit detailed analysis of physical, chemical, and biological hazards.

Expert Scientific Advice. The Toxicology Group's recognized experts have extensive experience working with regulatory authorities, trade associations and hundreds of industries. A database of over 500 chemical risk values, combined with The Toxicology Group's extensive experience, provides the best and most cost-effective solution.
