

U.S. State Beverage Product Licensing Program

NSF Bottled Water: Easy 50 U.S. State Licensing Program

Product licensing in all 50 states is often a frustrating and time-consuming process for even the savviest business professional. At NSF, we believe you should concentrate your time on your business growth rather than regulations and requirements.

The goal of NSF's Easy U.S. 50 State Licensing Program is to make the process as quick and hassle-free as possible. Our licensing specialist is your "go-to" resource throughout the process. We review all information and documents, assemble into applications and submit to the states.

Program Highlights

1. One point of contact through the whole licensing process
2. Efficient handling of all associated licensing fees and costs
3. Assembling of documents and completion of application forms for each state
4. Guidance throughout the permitting process
5. Basic label format review
6. Annual license renewals

Along with the NSF Easy U.S. 50 State Licensing Program, NSF provides a wide array of services to compliment the risk management programs of bottled water producers big and small.

Companion Services

1. Annual 50 state FDA compliance testing for source and finished product (a licensing requirement for many U.S. states)
2. Weekly source and finished product microbiological compliance testing
3. Annual audit of bottling facility (also a licensing requirement in many cases)
4. Full certification - Use the NSF Mark!

How do I sign up?
