

## Greenhouse Gas Management Services

NSF-ISR, a global leader in management systems registrations, has expanded its environmental services to provide verification and validation of Greenhouse Gas (GHG) inventories and projects and is one of a few leading bodies in this field to be accredited by ANSI.

### Why Quantify GHG Emissions and Removals

- Identify opportunities for improving energy efficiency and reducing operating costs
- Meet public and shareholder expectations for responsible GHG management
- Prepare for governmental regulation of CO2 and other GHGs
- Realize carbon banking and trading opportunities

### Benefits of Independent GHG Verification

- Allows sale of GHG offset credits from projects
- Provides confidence in reliability of GHG assertions
- Enhances public credibility of GHG reduction efforts
- Meets regulatory and voluntary GHG reporting initiatives
- Provides recommendations to strengthen your management of GHG opportunities and risks

### Our GHG Services

<p><b>GHG Inventory Verification</b></p>	<p>NSF-ISR provides independent assurance that reported emissions of greenhouse gases are fairly stated. Our verification service satisfies requirements of GHG reporting programs like The Climate Registry. This service is ANSI accredited.</p>
<p><b>GHG Project Validation</b></p>	<p>NSF-ISR validates that a greenhouse gas project is capable of delivering the emission reductions or carbon sequestration that its designers intend. This service is sometimes combined with the initial verification of offset credits. ANSI accreditation for this service is pending.</p>
<p><b>GHG Project Verification</b></p>	<p>NSF-ISR verifies that a greenhouse gas project has delivered the emission reductions or carbon sequestration that a project developer asserts. Our project sectors currently include landfill gas, livestock methane and forestry. ANSI accreditation for these sectors is in process.</p>

## Why Select NSF-ISR

- Confidence from working with an organization with more than 65 years experience in conducting third-party audits.
- Efficiency and audit productivity through risk-based audits that focus on the areas presenting the highest potential risk to your organization.
- We have unmatched technical GHG expertise. We helped to write the ISO 14064:2006 international GHG standard.
- Worldwide support from our international audit and service staff.

Let NSF-ISR put our expertise to work for you, providing value-added verifications and validations for assertions associated with greenhouse gas inventories and projects.
