

NSF Children's Products Safety Program

Satisfy Global Testing Requirements Through a Single Source

NSF International, a long established global Public Health & Safety company, offers a Children's Products Safety Program. The program has been designed to cover integrated consulting, testing and assessment services to assist children's product manufacturers in meeting international safety requirements.

Ensure Safety and Compliance in Your Children's Products

Your NSF program manager will customize a program to meet your needs. Our team can help you determine which standards, regulations and test methods are applicable to your product based on product type, age specifications and your geographic sales strategy. Components may include:

- Product Hazard Analysis/Risk Assessment: Including pre-production, production and random sampling
- Product, Materials and Packaging Testing: Mechanical/physical testing; flammability; toxicology review; chemical, heavy metals and phthalate testing
- Labeling: Label creation consulting and label compliance reviews
- Consulting: Product testing and compliance consulting to US and International standards and retailer requirements

Testing Capabilities

NSF offers a variety of testing capabilities. Whether you are looking to sell your product nearby or globally, we can supply the testing required to enter these key markets:

- CPSIA Compliance for the US Market
- EC Type Examination Certificate for the CE Mark and VDE-GS-Mark for the European Market
- Canada, Mexico, Australia, New Zealand and many more

Satisfy Global Testing Requirements Through a Single Source

NSF Advantages

The NSF Children's Products Safety team is located in the US, with regional offices worldwide to assist you with European, US and other International Standards. Our team of professional engineers, chemists, and toxicologists can evaluate/test your products, verify compliance and ensure they are safe for the markets you intend to sell them in. NSF's team also provides the following:

- An English speaking point of contact to guide you through the process
- Premium analytical reporting
- Competitive pricing for single or multiple products
- Informational webinars in English on standards updates
