

Onsite Wastewater Inspector Accreditation

Live safer.™

NSF Onsite Wastewater Inspector Accreditation

The premier recognition for realtors, banking institutions, health departments and homeowners.

NSF International offers the premier credential for onsite wastewater treatment system inspectors. This professional accreditation demonstrates an inspector's knowledge and skills for conducting onsite inspections. Accredited participants bring confidence to the user community and credibility to the inspection industry.

Benefits of Accreditation

- National recognition of competency
- Certificate of accreditation
- Hard copy directory and website listing of accredited inspectors (www.nsf.org)
- Accreditation valid for 5 years
- Use of the NSF Mark on related business materials (reports, letterheads, business cards, etc.)

NSF ACCREDITED
ONSITE WASTEWATER
INSPECTOR

NSF International, The Public Health and Safety Company™ has served the onsite wastewater industry for over 30 years, and is uniquely positioned to offer this professional credential. NSF product standards, testing and certification of onsite wastewater systems and components is relied upon by health departments and design engineers throughout the country.

NSF also brings this same demonstration of credibility and confidence to the Onsite Inspection Professional. NSF assists candidates with local examination coordination, as well as identification of related training programs, and access to applicable reference materials.

NSF Onsite Wastewater Inspector Accreditation

Accreditation Process

NSF grants its Onsite Wastewater Inspector Accreditation once a candidate has successfully passed both a written and a practical examination:

Written Examination

The written exam includes 100 questions focused in a number of onsite topics, such as:

- Terminology
- Calculations
- Conventional and Alternative Treatment Systems
- Dispersal and Disposal Systems
- Inspection Procedures

Practical Examination

Performed at an actual onsite installation site, the practical evaluation includes:

- Inspection Preparation
- Determination of System Use
- Evaluation of the Septic Tank
- Evaluation of the Drainfield
- Inspection Observations and Conclusions

Candidates who pass both examinations will then sign an ethics statement, signifying their commitment to honesty and integrity in their inspection services.
