

FSMA READINESS AUDITS FOR SUPPLY CHAINS

You may believe your immediate business operations are FSMA compliant, but can you say the same for every link in your supply chain? **NSF International can help.**

Our 70-plus years of food safety experience, combined with our expertise in FSMA compliance, means you will have a reliable partner capable of guiding you – and your supply chain – through the rigors of the FSMA legislation. Readiness audits set a baseline and identify areas for improvement. NSF audits cover all of the key industry sectors impacted by FSMA including produce growers, animal feed producers, food processors, importers and transporters.

Transport

Our FSMA readiness audits are a one-day review of systems and facilities and can also be done as an addendum to certification or other second-party audits – saving your facility time and money. These audits evaluate your supply chain's ability to comply with FSMA criteria. We assess current Good Manufacturing Practices (cGMPs) and preventive controls to assist your facilities and supply chain partners in identifying opportunities for improvement to meet FSMA rules.

Whether you're a manufacturer, grower or importer, NSF's FSMA readiness audits can help you track and control compliance across your supply chain.
