

## Nonfood Compounds Registration

Live safer.®

## NSF Nonfood Compounds Registration Program

The NSF Nonfood Compounds Registration Program assists manufacturers with formulating and marketing safe chemical products for use in food and beverage processing facilities. The program addresses the toxicology, odor potential and intended use classifications for a wide range of products including: cleaning, laundry, antimicrobial, hand care, pesticide, absorbent/anti-slip and sewer treatment products. Launched in 1999, NSF's Registration Program is based on previous USDA requirements established in the US FDA 21, 9 and 40 CFR.

### Benefits of Registration

With the ever-increasing need to safely reduce and eliminate microbiological, chemical and other physical contaminants in food manufacturing environments, processors must select products that meet safety and HACCP requirements. NSF's Registration Program gives manufacturers the benefit of an independent, third-party review that validates the safety and non-toxic properties of their product formulations. Registration with NSF's Nonfood Compounds Program will:

- Open new distribution channels to food and beverage manufacturers
- Increase credibility and distinguish your products in a competitive marketplace
- Reaffirm your commitment to safety
- Secure brand protection for your customers' products

### Brand Distinction

Products meeting the NSF requirements are issued a unique Registration number and provided with three tools to communicate their products' safety and quality to their customers:

1. Official Registration Letter
2. Listing on [www.nsfwhitebook.org](http://www.nsfwhitebook.org)
3. NSF Registration Mark to use on their products

Listing in the NSF White Book™ allows new customers to easily locate your products and provides the brand differentiation you've worked so hard to achieve. Review the category codes covered in the program on the reverse side.

### Contact

For more information on why you should choose the NSF Nonfood Compounds Registration Program, please contact:

# Product Categories for Nonfood Compounds Registration

Category	Category Code	Intended Use
Cleaning Products	A1	General cleaners
	A2	Soak tank, steam/mechanical cleaners
	A3	Acid cleaners
	A4	Floor and wall cleaners
	A5	Freezer floor and wall cleaners
	A6	Scouring cleaners
	A7	Metal polishes - nonfood contact
	A8	Degreasers/carbon removers
	AX	Ingredients for use in Cleaning Products
Laundry Products	B1	Laundry Products - food contact
	B2	Laundry Products - nonfood contact
	BX	Ingredients for use in Laundry Products
Nonprocessing Area Products	C1	General
	C2	Toilet/dressing room
	C3	Paint removers
	CX	Ingredients for use in Nonprocessing Area Products
Antimicrobial Products	D1	Antimicrobial agents always requiring a rinse
	D2	Antimicrobial agents not requiring a rinse
	DX	Ingredients for use in Antimicrobial Products
Hand Care Products	E1	Handwashing products
	E2	Handwashing and sanitizing products
	E3	Hand sanitizing products
	E4	Hand lotions/cleaners - nonfood contact
	EX	Ingredients for use in Hand Care Products
Pesticides	F1	Nonresidual pesticides
	F2	Residual pesticides
	F3	Rodenticides
	F4	Fumigants
	F5	Fumigants
	FX	Ingredients for use in Pesticides
Absorbents / Anti-Slip Agents	J1	General
	JX	Ingredients for use in Absorbents / Anti-Slip Agents
Solvent Cleaners	K1	Nonprocessing area products
	K2	Electronic instrument cleaners
	K3	Adhesives/glue removers
	KX	Ingredients for use in Solvent Cleaners
Sewer and Drain Cleaners	L1	General
	L2	Enzymatic Cleaners
	LX	Ingredients for use in Sewer and Drain Cleaners
Drying Agents	N1	Drying Agents
Miscellaneous Products	P1	Miscellaneous
	PX	Ingredients for use in Miscellaneous Products
