

Testing

Consumers look to private label brands as a value-added alternative to national brands. Through comprehensive product testing by NSF International, retailers can demonstrate their product quality meets or exceeds the leading national brands, helping increase their market share and earn consumer loyalty.

NSF provides all clients with value-added testing complemented by exceptional customer service. Your dedicated project manager will answer any testing questions, and will keep you informed about changing regulations and standards that may impact your product.

Testing

NSF offers a variety of test methods to verify your product's quality against a national brand or technical specification. Product quality issues can also be identified and isolated. With a team of consumer product experts and state-of-the-art testing capabilities, NSF offers a full range of product evaluation services including:

- Chemical analysis
- Microbiological analysis
- Toxicological review
- Claims verification
- Packaging integrity and functionality review
- Sensory panel reviews
- Risk assessment
- Physical product characteristics
- Product and labeling regulatory review

Results Delivery

NSF's customized test reports are comprehensive and easy to follow, covering the A to Z's of product testing. Plus, our free online portal provides a central location housing your company's confidential test reports and product specifications. Access is available 24 hours a day, every day of the year.
