

THE QAI DIFFERENCE

CERTIFIED ORGANIC

Organic Certification

QAI (Quality Assurance International) offers organic certification services at every step of the organic food production chain, from plough to plate. Founded in 1989, QAI is one of the first professional certification bodies for organic integrity. Our unsurpassed expertise and industry knowledge from over 20 years of organic certification leadership is the QAI difference.

WHY CHOOSE QAI?

- > Straightforward certification fees
- > Exceptional customer service
- > Recognized leader by the industry and consumers
- > Comprehensive service offerings
- > Save time and money by bundling certifications

THE QAI DIFFERENCE

Cost

For handler operations, we base our certification fees off the number of products to be listed on your organic certificate. This means you pay a fair price for your organic certification no matter how big your business grows.

Customer Service

At QAI, our emphasis on exceptional, professional customer service combined with extensive regulatory compliance knowledge sets us apart from other organic certifiers. We assign each company a dedicated project manager to oversee your certification process and keep you on track each step of the way.

Brand Recognition

The QAI mark is trusted by leading organic companies and more consumers than any other major organic certifier. Our "Q" certification mark appears on more organic products and has the highest consumer recognition amongst major organic certifiers (NSF Brand Survey 2013). By working with QAI for your organic certification you can leverage the strength of the QAI mark on your products.

One-Stop Resource

Through NSF International, QAI's parent company, we offer a wide range of complimentary certifications and services that you can bundle to save time and money. Your organic certification can be combined with Gluten-free, Non-GMO Project and Kosher certifications. We also offer the full range of GFSI (SQF, BRC, IFS, FSSC 22000, GLOBALG.A.P., CanadaGAP, PrimusGFS) certifications.
