

MEETING FSMA REQUIREMENTS ANIMAL FEED AND PET FOOD

The Food Safety Modernization Act (FSMA) regulations required by the FDA continue to have a profound impact on the animal feed and pet food industries. Large businesses must focus on hazard analysis and risk-based preventive controls while remaining compliant with Current Good Manufacturing Practices (cGMPs), sanitary transportation and foreign supplier verification. Small businesses will need to focus on cGMPs while very small businesses will need to begin preparing for cGMPs. Regardless of your company's size or current stage of FSMA compliance, **NSF International can help.**

Our 70-plus years of food safety experience, combined with expertise in FSMA compliance, provides you with a reliable partner capable of guiding you through the rigors of FSMA compliance. Select from our suite of audits, training and strategic consulting services to best suit your FSMA needs. If you are uncertain what services you need, let our specialists customize a plan for you.
