SIMPLE, RELIABLE RETAIL TESTING

Since our founding in 1944, NSF International has helped manufacturers and retailers streamline their testing process to get their products to shelf faster and maintain high safety and quality standards. We review and test products against established protocols developed through a fair and transparent consensus-based process. Our independent, third-party testing and certification eliminates the need for individual retailer testing, multiple laboratory tests, and provides standardized requirements for home goods manufactured and sold around the globe.

With over 165,000 square feet of ISO/IEC 17025-accredited, state-of-the-art laboratories around the world, NSF has your testing and certification needs covered wherever your business takes you. Our home product testing labs are located in key manufacturing locations in North and South America, Europe and Asia.

THE CERTIFICATION PROCESS

NSF uses a straightforward yet comprehensive certification process that offers assurance to retailers and quick turnaround times to manufacturers.
