

# HYGIENICALLY CLEAN NAPERY CERTIFICATION

NSF's third-party certification verifies that your napery is hygienically clean. Clean linens in foodservice establishments are an essential part of food safety and public health. Certification helps give your customers added confidence that your napery meets hygienic standards while helping protect your company's brand and reputation. NSF International has been certifying products and systems to protect public health and safety since 1944. In that time we have honed the process to be as streamlined as possible without sacrificing our high standard of quality or attention to detail.

## CERTIFICATION BENEFITS

- > **Brand protection**
- > **Service product differentiation**
- > **Third-party validation to help assure hygiene**
- > **Use of the internationally recognized NSF P413 mark on product promotional materials**
- > **Listing on NSF's public online directory**
- > **Tested samples coupled with an onsite facility process evaluation ensures complete validation of a consistent process**

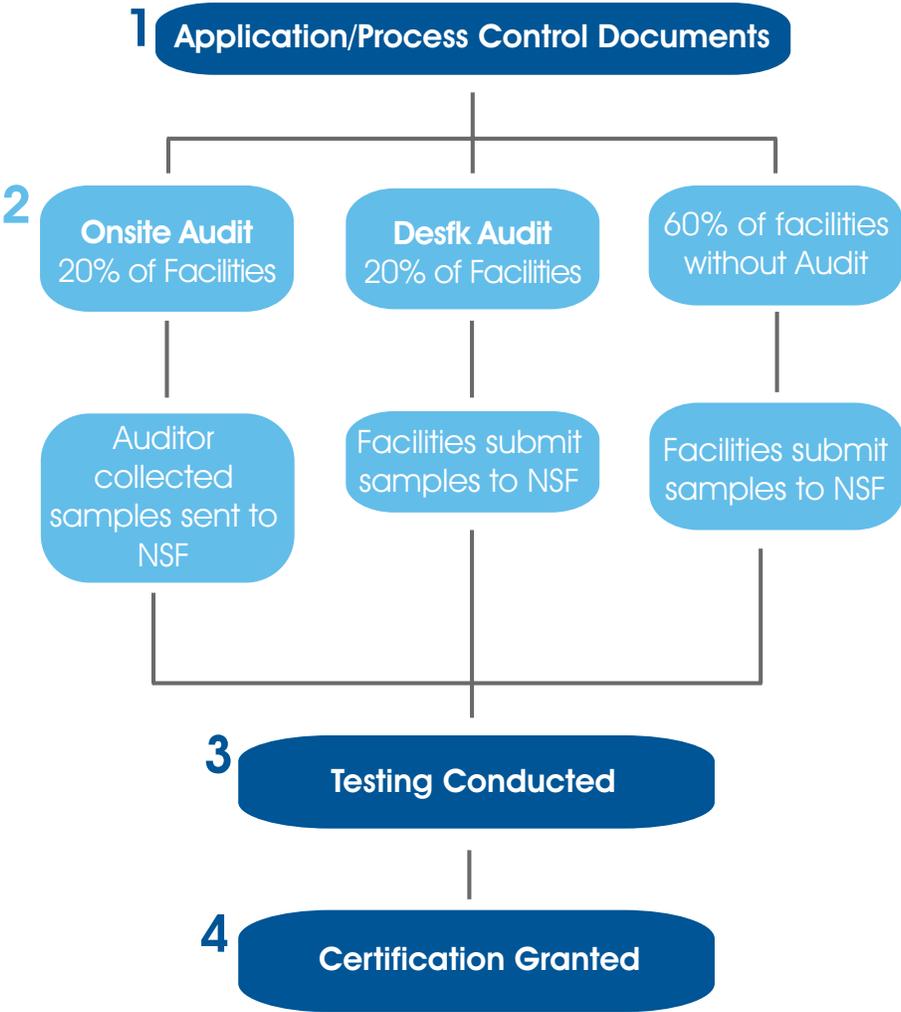

Recognized by regulatory agencies at the local, state, federal and international levels, the NSF certification mark is trusted to signify quality and safety. Turn the page to learn about our four-step certification process.

# HYGIENICALLY CLEAN NAPERY CERTIFICATION

## NAPERY CERTIFICATION

NSF follows a simple, yet thorough process designed to achieve quick turnaround times, resulting in complete product certification within a reasonable time frame.

Please contact us to get started on your certification. We will assign you a dedicated project manager who will work with you to guide your certification project from start to finish.
