

ISO 9001 QUALITY MANAGEMENT SYSTEM

ISO 9001 provides a set of uniform requirements for a quality management system (QMS).

The foundation of ISO 9001 is having a QMS designed with a strong customer focus and with the support of top management, operating in an environment of continuous improvement. ISO 9001 can be used by any organization, large or small, regardless of industry sector.

A QMS is designed to be compatible with other management system standards and specifications such as ISO 14001 (environment) and ISO 45001 (occupational health & safety). These compatible standards can be integrated seamlessly with NSF-ISR audits, providing additional value.

POTENTIAL BENEFITS

A focus on quality management is essential in sustaining business success. With over one million ISO 9001 certificates issued around the world, certification is no longer “a nice to have,” but part of an organization’s ongoing improvement plan. For both service and manufacturing organizations, the potential benefits of a certified ISO 9001 management system may include:

- > Continuous business improvement
- > Reduced waste and improved productivity
- > Greater cost-effectiveness
- > A passport to the global market
- > Improved product, process and service quality
- > Improved internal communications

NSF has been my registrar of choice for the last 30 years of my career with all the companies I have worked for.

— CHARTER STEEL

I have worked with NSF for many years and appreciate the customer service and professionalism very much.

— SULZER TURBO SERVICES HOUSTON INC.

Auditor was well qualified, very knowledgeable, and helpful. NSF was very efficient in correspondence, facilitating the process, and supportive in helping us work our way through the certification process and requirements.

— MONTEL PLASTICS

ISO 9001 QUALITY MANAGEMENT SYSTEM

WHY CHOOSE NSF-ISR?

- > Member of national and international committees contributing to standard development
- > Lead auditors with over 10 years' experience, bringing you deep industry knowledge
- > Consistent high satisfaction levels across clients
- > Creative, value-added audit solutions to help your organization meet its certification objectives
- > Single point of contact for easy-to-reach communication and scheduling across standards
- > Highly qualified staff to assist with transfer of existing certifications
- > Regular quality management system-focused webinars and additional resources available on demand

Been dealing with NSF-ISR for 5 years now and cannot say enough about the professionalism and guidance we have received.

— ALLIED CIRCUITS
