

TRAINING AND EDUCATION NSF/ANSI 50, 60 AND 61

NSF International provides in-depth training on the requirements of NSF/ANSI drinking water and recreational water standards. As public health and safety standards evolve, employee training and education is essential to stay ahead of the curve. With over 70 years of public health experience, NSF provides high quality training and education to support business professionals, the regulatory community, industry and associations in the areas of water quality and safety.

NSF led the development of the American National Standards for all materials and products that treat or come in contact with drinking water, as well as standards for pool, spa and recreational water equipment requirements. Today, most major plumbing codes and state regulations require certification to NSF standards for plumbing, water distribution and recreational water products.

COURSES FOR THE WATER INDUSTRY

NSF/ANSI 50:

This one-day course is designed for recreational water equipment and chemical manufacturers to gain knowledge of the NSF/ANSI 50 standard certification process and technical requirements. Regulatory officials and operators or managers at recreational water facilities will gain valuable insight into the public health protection provided by NSF/ANSI 50. Products covered include treatment chemicals, chemical feeders and generators, controllers, UV, filtration, pumps and skimmers. You will receive a course guidebook and the NSF/ANSI 50 standard.

▶ **SEPTEMBER 12, 2018, ANN ARBOR, MI**

NSF/ANSI 60:

This one-day course provides chemical manufacturers, repackagers, blenders and distributors a thorough overview of the NSF/ANSI 60 standard requirements, certification processes, development of health-based criteria for contaminants and regulatory requirements. You will receive a course guidebook and the NSF/ANSI 60 standard.

▶ **APRIL 19, 2018 OR OCTOBER 17, 2018, ANN ARBOR, MI**

TRAINING AND EDUCATION NSF/ANSI 50, 60 AND 61

These courses are taught by NSF International staff who have decades of experience with the standards, providing education and training on the requirements as well as the related NSF certification processes that benefit both you and your company in this competitive market.

COURSES FOR THE WATER INDUSTRY

NSF/ANSI 61:

This one-day course provides manufacturers of municipal drinking water treatment, distribution equipment and building plumbing products an in-depth look at NSF/ANSI 61 requirements and the NSF certification process. The course also covers the development of pass/fail criteria for both regulated and unregulated contaminants, and a review of regulatory requirements for NSF/ANSI 61. You will receive a course guidebook and the NSF/ANSI 61 standard.

► **APRIL 18, 2018 OR OCTOBER 18, 2018, ANN ARBOR, MI**
