The NSF Certification Process for Drinking Water Treatment Units

NSF International has been testing and certifying products for over 60 years. In that time, we have refined the certification process to make it faster and less complicated for our clients while still continuing our tradition of thorough testing and exceptional attention to detail.

By assigning a dedicated NSF certification project manager (CPM), clients have a single point of contact who will help guide and oversee the project during each step of the certification process.

For more information, please contact your certification project manager or contact dwtu@nsf.org or (+1) 734.769.8010.
